

Capability Statement

Introduction

Highland Peak is a research and strategic advisory company. We specialize in addressing CIO concerns and operate in the intersection of research, management, and technology engineering. We enable our clients' business outcomes by helping organizations chart their modernization landscape and reduce complexity in their transformational initiatives. This is accomplished by research, promotion and application of technical practices, use cases and techniques.

Core Competencies

As a research and strategic advisory company, we specialize in current and emerging CIO level concerns across the private and federal sectors. We specialize in complex systems engineering and transformation.

- **Research:** Identifying and brokering Business and IT Best Practices across vertical industries.
- **Strategic Advisory:** Business Transformation, Enterprise Architecture and Engineering, Program Management and Systems Engineering, Acquisition Strategy and Planning, IT Service Management, and Cybersecurity and Risk Management.

Differentiators

- **Our Focus:** We focus on our clients' business outcomes by helping organizations chart their modernization landscape and reduce complexity in their transformational initiatives.
- **Our People:** We are multidisciplinary experts with over 20+ years of experience in engineering, acquisition, and transformation of complex systems.
- **Our Methodology:** Applies Program Management and Systems Engineering practices to guide complex projects.
- **Our Core Values:** We believe, above all, in building and maintaining trust and integrity with our customers.
